Brent Owen
Software Developer

Chattanooga, TN 37343   (423) 802-0994   brent.e.owen@gmail.com   https://github.com/bowen227

Experience

Brilliant Directories - Deco Marketing
Took PDF's and assets to Landing page. Added responsiveness and updated color theme, icons and fonts on all pages.

Shopify - Sierra Solutions
Took PDF and assets to landing page. Setup navigation to product pages.

RealGeeks - Aimee Holden
Built custom layouts and carousel. Added hover effects and updated responsiveness of existing pages for multiple sites. Change color themes and fonts.

Projects

Social Clone
Frontend built with Angular and TypeScript. Uses Firebase for Authentication and Firestore to hold the data. Can sign up, login, create posts, add friends, like other posts and create comments on posts. - https://github.com/bowen227/SocialClone

NodeJS with Express
Small server that serves static data with CRUD operations. - https://github.com/bowen227/simple-practice-api

net Core WebAPI
Backend server for my personal profile site. Holds all the endpoints for the small web apps. - https://github.com/bowen227/profileBackEnd

JavaScript - Concepts with Small Web Apps
Small web apps showcasing differen't concepts from DOM manipulation, working with classList, loops and consuming data from API's. - http://brentowen-net.s3-website-us-east-1.amazonaws.com/

Personal Profile Site
Frontend was built with Angular, TypeScript, Ng2-Charts, Charts.js, EmailJS, Bootstrap, Fontawesome and Google Fonts. Uses Firebase for Authentication. Backend setup with .net Core, C# and Swagger.

Skills

Frameworks / Libraries
